Emergency Response and File-of-Life Policy
Willowbrook at Hanover
Effective January 1, 2026

1. Every residential unit has a hard-wired emergency-call station. Every resident is issued a pendant. Calls annunciate at the staffed concierge desk and at the wellness office. A community employee responds in person. The system is not a private alarm contract under which an outside vendor calls 911 and the community has no duty to follow up.

2. For each resident the wellness office keeps a file-of-life packet: current medications, physician name, allergies, and any DNR or advance directive. A copy is stored in the packet by the apartment door for emergency medical services. Staff check the packet after a call.

3. Oxygen concentrators and similar in-unit clinical equipment may be used only with notice to the wellness director. Staff confirm that tubing is safe and that the resident is being followed by the contracted home-health agency or by a provider the community has coordinated.

4. Exterior doors lock at 8 p.m. Corridor handrails are part of the resident-safety program.
