Dining and Wellness Program
Willowbrook at Hanover

Congregate meals are planned by a dietitian consultant for the dietary needs of older adults, including diabetic, low-sodium, and texture-modified diets. Meals are served in the community dining room. The dining program is described in the operating budget as part of the health-and-wellness program, not as a restaurant amenity for a social club.

The monthly activity calendar is built around physical, social, and mental wellness issues common to older adults: fall prevention, blood-pressure education, diabetes education, and cognitive wellness. Generic social events occur, but they are not the stated emphasis.

Housekeeping, linen service, and scheduled transportation to physicians are offered. Management’s written emphasis, in the resident handbook and in marketing, is the health benefit of those services. The handbook states that these services are not offered merely so that residents can enjoy a convenient social living environment.

The wellness clinic, the pendant response, the nursing staff, and the transfer to licensed assisted living are services not typically offered in ordinary multifamily rental housing in Hanover County.
